

Maria hi,

Concerning licenses: KISA did not apply for any permits regarding the building. The extra toilet was built without any particular permits by the authorities because we thought it will remain only for the time period we will use the building or we will turn it in case the authorities disagree with this use, into a small storage place.

Concerning the parking: The space is Turkish Cypriot property. We asked the Ministry of Interior of the former government to allocate it to us in order to use it as a parking. Initially, the answer was negative because only Cypriot refugees have the right for the use of Turkish Cypriot property in the south. Later, we negotiated with them and they transferred it under the jurisdiction of the Municipality with the agreement to sub rent it to KISA in order to be used as a parking place for the migrants and refugees who visit the center for advice.

We spoke recently with the ministry of Interior about the parking and the response was not very encouraging. They gave us the impression that they don't see with a positive eye. They consider that KISA is not eligible for use of Turkish Cypriot property.

Best
